Tuna Cube

Tuna Steaks Natural and Treatment

Tuna Loin Natural and Treatment

Tuna Saku Natural and Treatment

Super Frozen

We specialized in processing with Brine Ultra Low temperature (minus 50° C) for enhancing beautiful product to our customer, such as Tuna, Marlin, Mahimahi.

The quick processes and freezing will maintain optimum freshness of our product.

Food Safety and Sustainability

We committed to provide consistency best quality product and service throughout foodsafety and while ensuring the ethical standard towards environmental sustainability.

Product

The company has a variety of products within their range including the yellowfin tuna loins, tuna saku, tuna steaks, tuna cube, ground tuna, albacore loin, skipjacks, and other finished products. Our activities include production planning, logistics, trading and quality assurance in our Tuna products. The company's customers include major tuna brands, tuna processing plants, fishing companies and others.

Contract Processing

Here in GSM, we partner with our clients to assist them in growing their businesses. With our technological oriented production plant in Indonesia, we provide clients with the ease of processing their products. We could assist in the process of the Tuna into packaging provided by the clients. By so, businesses should no more focus onto processing but instead watch their profit grow. We could provide clients with additional materials, treatments, quality depending onto their preference. No matter the dimensions, we could do it for you.
